

July 23, 2018

Dear valued customer,

Please be advised that as of August 30, the required warnings under California Proposition 65 will change to incorporate additional information. Product produced and packaged prior to this date are not required to reflect this new warning.

California Proposition 65 is intended to protect citizens of California from chemicals known to cause cancer, birth defects, or other reproductive harm, and to inform citizens about exposures to such chemicals. (Source: <http://www.oehha.ca.gov/prop65.html>) Proposition 65 is focused on the content of regulated products sold in California. Whether or not a product contains a listed chemical has no bearing on the safety of the product when used properly.

As previously communicated, this change will impact some OLFA Self-Healing Cutting Mats, Rotating Cutting Mats, Folding Cutting Mats, 18mm Heavy-Duty Cutters, 25mm Extra Heavy-Duty Cutters, Craft Knives, and Rotary Cutters, which may contain chemicals included in the California Proposition 65.

In August, all of the newly produced OLFA products listed above will ship from our regional distribution centers labeled with the new required caution statements. The warning label is only required in California, not in any other states.

DEHP – WARNING: This product can expose you to chemicals including Di(2-ethylhexyl)phthalate (DEHP), which is known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov.

LEAD – WARNING: This product can expose you to chemicals including lead, which is known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov.

NICKEL – WARNING: This product can expose you to chemicals including nickel, which is known to the State of California to cause cancer. For more information go to www.P65Warnings.ca.gov.

CHROMIUM-HEXAVALENT – WARNING: This product can expose you to chemicals including chromium-hexavalent, which is known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov.

If you sell to or distribute to stores located in California, it would be best if you, or your customer, placed a Prop 65 warning sign at POS until all non-labeled inventory has sold. Also, it is required for e-commerce websites that sell to California residents to include the warning on their website with the product listing.

If you have any questions concerning this transition, please contact Jason Feldner at Jason.feldner@corellebrands.com.

Best Regards,

Jason Feldner
